40187	QMM 510	Stats Analysis for Managers	M	

Fall 2008 Notes and Special Topic Course Descriptions:

(For all other course descriptions, please visit the University Catalog link at:
www.sba.oakland.edu/grad/)

Note 1:

This course will fulfill your 600 level IT requirement.

Note 2:

This course will fulfill your international elective requirement.

Note 3:

These courses are designed for the MACC (Masters of Accounting) student. MBA students with an accounting background may take these courses with permission from Donna Free, Faculty Coordinator Masters of Accounting Program. These 500 level courses will fulfill the 600 level MBA elective requirements. For MBA students, ACC 630 will fulfill an open elective; it will not fulfill any 600 level accounting requirements. If you are not a MACC student and wish to complete any of these courses contact Donna Free at free@oakland.edu for permission.

Note 4:

All students must complete a capstone course, (ACC 660 for MACC students, MGT 535 or MGT 536 for MBA students and MIS 650 for MSITM students). Advisor permission is needed to register for these courses. Call the Office of Graduate Business Programs at 248.370.3287 to be registered. This course should be taken at the end (or near the end) of your program.

Note 5:

For MBA students, ACC 630 will fulfill an open elective only; it will not fulfill any 600 level accounting requirements if you are a MBA student. This course is recommended for MACC students who wish to qualify for CPA certification.

Note 6: MGT682/MKT 680- Entrepreneurial Marketing

If you are interested in marketing and think that you might ever start a new company or introduce a very innovative product or service, this is the course for you! These entrepreneurial settings require making unique marketing choices that will determine whether you experience the agony of failure or the ecstasy of success. The course combines marketing theory with practical advice that will guide you in the day to day decisions you will have to make. Specifically, the course explains how to:

- build a marketing program when you have almost no money.
- conduct market research, when potential customers have never contemplated anything like your product before

- maximize the amount you learn as you market your product.

Grading will be primarily based upon essay tests and papers. Class activities will include cases, lectures, guest speakers and experiential exercises.

Note 7: ORG 680 – Electronic Symposium

The topic of “diversity” is everywhere these days, but free discussion of the issue is hard to find. Yet, certainly a matter of this importance should be examined from all sides. This class is intended to provide an opportunity for open and robust discussion of diversity and the related matter of affirmative action, using a range of contemporary writings representing different perspectives. We’ll look at issues like what does diversity really mean, what is the evidence that diversity benefits an organization, how do the mechanisms that promote diversity in an organization actually work, and why is there such a taboo around the issue of diversity. The class will take place on the internet, which provides a wonderful means for holding free discussion.

Note 8: POM 680 – Lean Principles & Applications

The goal of this course is to prepare students with knowledge and skills related to the understanding of lean theory, rules/principles, concepts, tools and supporting systems based upon interdisciplinary perspectives and instruction. This is a pioneering course at Oakland University where the faculty and students from three schools, School of Business Administration, School of Engineering and Computer Science and School of Education and Human Services; participate and learn about LEAN from each other’s perspectives. This course also incorporates the application of what is learned in the classroom to a real world setting, which is denoted as the 1 credit “lab” portion of the course. Cross-functional teams comprised of students from each school will spend time outside of the classroom at a company to assist them on their lean journey. The course is taught by OU faculty and guest instructors to provide a well-rounded view and approach to lean and all of its implications.

NOTE 9: ACC 680 – Financial Analysis for Non-Accountants

ACC 680 is a study of financial accounting and reporting from the perspective of the user of accounting information. The course will emphasize the interpretation and analysis of specific accounting treatments rather than accounting methodology. This course is designed for the MBA student who has completed ACC 511 or was waived from ACC 511 and is required to complete a 600 level accounting elective. The course will provide additional insight into the area of financial accounting and discuss how to interpret the financial statements for decision making. (Prerequisite: ACC 512 and admission to a graduate business program; no credit will be given to a Masters of Accounting student.)

Other Important Information:

Closed Classes and Waitlists:

Waitlists are maintained by the Graduate Business Programs Office and used for all upper level accounting and graduate level courses. Once a class has reached capacity, the class size will be reduced to 5 and as students drop, students from the waitlist will be emailed. The GBP Office will give students a few days to respond before offering the available spot to the next student of the waitlist. Faculty will not add students who are not on the waitlist. Therefore, if your class is closed go immediately to the waitlist and complete the form. <http://www.sba.oakland.edu/root/waitlist/> There is no need to contact the Graduate Business Office, Donna Free or Paul Trumbull.

Graduation:

To be awarded your graduate business degree or certificate, you must complete an application for degree. This application is completed on-line at: <http://www2.oakland.edu/registrar/graduation.cfm>

Students who will complete their degree/certificate requirements at the end of Fall 2008 the application deadline is the last Friday in September. Students who will complete their degree/certificate requirements at the end of Winter 2009 the application deadline is the last Friday in January. Please review the chart below:

Fall 2008 Semester	Last Friday in September
Winter 2009 Semester	Last Friday in January
